

## **NSS Schedule and Medication Refill Guidelines**

### **Scheduling Changes:**

At Neurosurgical Spine Specialists Dr. Rawson's schedule is subject to change for reasons such as: emergency surgeries, hospital call duty, speaking at and/or attending medical seminars, etc. We do our best to minimize any changes to your scheduled appointments or surgery dates, but ask for your patience in this regard.

### **Medication Refills:**

Medication refills may take up to 2 business days to complete. When you call or leave a message for a refill the nurse may need to ask you questions about your health history to make sure your present condition is being addressed effectively.

Please take your prescriptions as ordered for your health safety and so that you will not run out of medication too early. If the medication does not seem to be effective, please call our office and speak to a nurse.

If Dr. Rawson has prescribed a scheduled drug for you, your prescription history may be checked on the Michigan Automated Prescription System (MAPS). HIPPA regulations apply.
